

## Changed Formulation for YH 9

The hardener YH 9 is used exclusively in the Marabu® Poxyl Y ink series.

Due to a raw material cancellation by the manufacturer, the main ingredient of YH 9 must be replaced (Force Majeure).

For the basic shades and varnish, the recommended mixing ratio remains the same (120 g/unit). Concerning the amount added to Black 980, we were able to achieve a reduction from 185 g to 160 g/unit. All other properties remain unchanged.

For further information on Marabu® Poxyl Y please refer to [www.marabu-inks.com](http://www.marabu-inks.com)

### Date of change-over

This change becomes effective starting with **batch 101** (immediately). You will find an additional remark on the label stating:

**„Attention: Modified Formula“**
